## New ECOLOGO® Certification for GMS Industrial Supply!

*The Green Oger® remains unstoppable with this new credential!*

**Virginia Beach, VA – September 7, 2018** – GMS Industrial Supply, Inc., already renowned for their environmentally friendly product line, announced today that its Green Oger BIO, Natural Reflections BIO, Super Natural Bowl Buster BIO, and Green Oger Jr. BIO have earned UL's ECOLOGO® Certification, offering third party validation of its superior health and sustainability performance.

One of the most respected third party environmental labels in the market today, the ECOLOGO mark signifies that the Green Oger BIO, Natural Reflections BIO, Super Natural Bowl Buster BIO, and Green Oger Jr. BIO meet the rigorous, life cycle-based environmental performance criteria as defined in UL's stringent ECOLOGO standard (Standard 2759), which evaluates multiple criteria throughout a product's life including energy use, waste disposal, and toxics reduction, among other areas.

"GMS Industrial Supply has consistently strived to meet the goals of the Department of Defense, including but not limited to waste reduction and cost savings while providing a benefit to the environment. With the ECOLOGO label, it further certifies that our Green Oger BIO, Natural Reflections BIO, Super Natural Bowl Buster BIO, and Green Oger Jr. BIO, is manufactured in ways that minimize environmental impact, providing a sustainable option when it comes to cleaning multi-surfaces," said Rachel Gorken, owner and president of GMS Industrial Supply, Inc.

By earning the UL ECOLOGO certification, GMS Industrial Supply can now more fully understand, measure, and credibly communicate the superior environmental performance of their products, while communicating its sustainability leadership and environmental stewardship.

### About UL Environment

UL Environment, a division of UL (Underwriters Laboratories), works to advance global sustainability, environmental health, and safety by supporting the growth and development of environmentally preferable products, services, and organizations.
